

**A Brown Machine
Product Line**

**EPCO
Machinery Services**

North America's Leading Machinery Services Provider for Injection & Extrusion Molding, Blow Molding, and Die Casting Equipment.

Since 1959, EPCO has been helping machinery owners keep their investments up-to-speed, producing at maximum capacity, and state-of-the-art. Our experienced staff is second to none in the industry, making us unique among machine remanufacturers.

And today, we are part of the Brown Machine family of products and services. As a Brown product offering, our capabilities have expanded significantly, adding more technical personnel, more service staff, and a more comprehensive engineering department.

Our full line of machinery services include:

- Plant Services (at your location)
- Remanufacturing (parts and machines)
- Plant Relocation (machinery and transportation)
- Parts, Service & Repair (24/7)
- Control Upgrades (new technologies)
- Safety Upgrades (OSHA, ANSI & ISO)

Here is a partial list of the brands of machinery that we service, repair, and remanufacture:

Injection molding

- Battenfeld
- Engle
- Farrel
- Hettinga
- Husky
- HPM
- Jaco
- Milacron
- Mini-Jector
- New Britian
- Nissei
- Mitsubishi
- Reed-Prentice
- Toshiba
- Ube
- Van Dorn Demag
- Wabash

Blow molding

- Milacron
- B&W
- Bekum
- Hartig
- Hayssen
- Heins
- IMPCO
- Jomar
- JSW
- Lesan
- Norland
- Sidel
- SIPA
- Sterling
- Techne
- Uniloy

Die Casting

- American
- B&T
- Buhler-Prince
- Castmaster
- National
- Harvill
- HPM
- Kux
- Lester
- Kard
- KR Wilson
- Frech
- Birch
- Wotan
- UBE
- Toshiba
- Quantum

We have many ways to help you hit production and profit targets:

Plant Services

In this day of shrinking maintenance departments, EPCO can be your one stop shop for all maintenance functions, whether it's routine preventive maintenance, machine repair, parts replacement, or complete machine rebuilding on your shop floor. And now, with our expanded engineering and parts department, EPCO can rebuild a major component at Brown and replace it at your facility. We can build any outdated or obsolete part, or upgrade controls and software to bring your machinery up to today's production capabilities. Call us today to learn how EPCO can be your new fully-staffed and expanded contract maintenance department.

Machine Remanufacturing

The EPCO remanufacturing process is comprehensive and easy. An EPCO representative thoroughly examines your machine, then provides a written quote for the remanufacture. The machine is then shipped to us and completely disassembled. Every part is inspected to determine the level of wear compared to original factory specs, then cleaned and remachined if necessary. After reassembly with new parts (and often updated controls), the machine is then tested at full capacity to ensure optimum performance. A fresh coat of paint is applied, along with all current safety labeling and guard requirements. Upon receipt of your remanufactured machine, an EPCO service representative is available to supervise on-site start up and machine operation. Full documentation of the project is provided for your files. All EPCO remanufactured machines come with a full one year warranty.

Control Upgrades

Let an EPCO engineer recommend potential control upgrades that could dramatically increase your machine's productivity level as well as its quality

control capabilities. Just like with any software and hardware, recent technological advancements in controls can greatly enhance machine performance.

Plant Relocation/Equipment Installation

We are your **Single Source** for moving one machine or an entire plant. Whether it's just down the road or across the country, EPCO's complete turnkey services can get you moved, and back into production. No one knows more about moving machinery and re-installing it, faster, better, and more efficiently. At your facility, we handle disconnects, coordinate transportation, then install machinery in the new facility, start-up and completely test each machine. We also manage all new utility and hook-up requirements, and coordinate union and local agency compliances.

Safety Upgrades

EPCO can audit your facility to ensure it meets any or all ANSI, OSHA, and SPI compliance standards. With all compliance audits, we also provide quotes for bringing your machines into compliance. Safety upgrades can have long-term benefits through the reduction of lost-time accidents, thereby potentially reducing your liability and workers' comp costs.

Service & Parts: 24-7

As a product line of Brown Machine, EPCO's capabilities have greatly expanded. We now can provide unparalleled service and support worldwide, including engineering and tooling services, a parts manufacturing cell, and an extensive parts' inventory.
