

*EPCO's experienced personnel can bring your machine control system up to today's functionality and operating speeds.*

### Older Machinery Can Perform Like New Again With State-of-the-Art Controls Upgrades

Maximize your productivity and profitability with EPCO's complete range of new controls. Just consider how much your own PC has changed in the last five years. Machine controls have changed that much also. Why settle for less than your machine's full potential? We can provide complete customization services, both hardware and software, for systems integration and data management on all popular makes and models. Regardless of your production requirements, we can supply a control system specifically tailored to your exact needs. And, the payback for a complete controls upgrade can be realized quicker than you would think.

#### More Controls Integration Experience Than Other Providers

EPCO offers more options to meet your technology and budget guidelines than any other machinery services provider. EPCO delivers control technology from industry-leader partners like Allen-Bradley, Barber-Colman, and more.

*Here is a partial list of the brands of machinery that we service, repair, and remanufacture:*

#### Injection molding

- Battenfeld
- Engle
- Farrel
- Hettinga
- Husky
- HPM
- Jaco
- Milacron
- Mini-Jector
- New Britian
- Nissei
- Mitsubishi
- Reed-Prentice
- Toshiba
- Ube
- Van Dorn Demag
- Wabash

#### Blow molding

- Milacron
- B&W
- Bekum
- Hartig
- Hayssen
- Heins
- IMPCO
- Jomar
- JSW
- Lesan
- Norland
- Sidel
- SIPA
- Sterling
- Techne
- Uniloy

#### Die Casting

- American
- B&T
- Buhler-Prince
- Castmaster
- National
- Harvill
- HPM
- Kux
- Lester
- Kard
- KR Wilson
- Frech
- Birch
- Wotan
- UBE
- Toshiba
- Quantum

**EPCO provides hardware and software upgrades that take your older machines to a new level.**

**Why You Should Consider Upgrading Your Older Plastic Molding or Die Casting Equipment With Improved Operational Controls**

Our continued goal at EPCO is to help you maximize the efficiency and return on investment of your production machinery.

EPCO can help you in these areas. The never-ending search for:

- Increased productivity,
- Improved quality levels,
- And decrease in scrap production.

Let an EPCO engineer recommend potential machinery control upgrades that could dramatically increase your machine's productivity level as well as its quality control capabilities. Just like with any software and hardware, recent technological advancements in controls can greatly enhance machine performance., and tremendous improvements have taken place in the last few years. Bring new life to that aging capital investment. Call us today and we can show you how we'll tackle your toughest machine control upgrade challenge.

**Better, Smarter, Faster... Since 1959**

- Better- because our pricing is typically lower on hundreds of parts
- Smarter- because we've been pioneering machinery services for nearly 50 years and stay on top of technology changes.
- Faster- because we have the facilities, personnel and resources that other, so-called, competitors don't have.

**Service & Parts: 24/7**

- Service and Parts available to you- any hour, any day.
- Supplier of DYNISCO Pressure and Temperature Instruments and accessories for all makes and models of molding machines and auxiliary equipment.
- GATES Hose Assemblies
- And there's more. If you can't find the machine you're looking for and need special processing capabilities, call EPCO. We have the experience and resources to match the best software with the best hardware for your specific needs.

**Why Choose EPCO for Control Upgrades?**

EPCO has completed thousands of control upgrades for its customers. New control systems can be designed and/or customized by EPCO's in-house team of electrical, hydraulic, and mechanical engineers. All installed systems and kits come complete with all components, and include program and wiring documentation. Customer training is hands-on, with over-the-phone and online troubleshooting. Call EPCO today, then ask around the industry and discover why EPCO continues to lead the machinery services industry with production-proven innovations. We work on a lot of machines during the course of the year, and can provide an unbiased recommendation on new equipment and system upgrades.
